

ANote

the slash menu, and the keys

Typed in the note

/	every block this editor has
/table	a table whose columns drag wider
/drawing	Excalidraw, in a dialog over the note
/tabs	three panes in one place
/toggle	a fold, shut when the note opens
/code	a fence, with a language on it
# + space	a heading, markdown-style
- + space	a bullet. `1.` and `[ ]` too

Held down

Cmd S	save — a note is a file, so this is the file's
Cmd B / I / U	bold, italic, underline
Cmd Shift 8	a bullet list
Cmd Shift 6	a toggle list (not over a .md)
Tab / Shift Tab	nest a list item, or lift it out
Cmd Z	undo, per note, kept across tab switches

In the palette

ANote: New Note	into notesDir, named for today
Open as Note	a .md file, in this editor
Open Preview	a webview beside the note
Copy Preview Link	a loopback URL, for a browser
Open Studio	the notes folder, in Chrome
Export as Markdown	the note, as text
